

Immersive multimedia display for engaging marketing

lumina is a high-impact multimedia display that, thanks to its high-quality LCD screen, allows for the playback of color videos and images, making the in-store experience much more engaging and rich in interesting content for the consumer.

Elegant and versatile, it can be installed in various configurations according to display needs, highlighting products in any department with optimal performance in terms of durability and longevity.

Available in both single-sided and double-sided versions, it integrates seamlessly into any retail environment, with fully customizable frames and stands in any color.

An engaging and smart digital signage solution that enhances visual communication at the point of sale, with quick and dynamic updates of pricing, promotions, product and brand information, making marketing initiatives significantly more effective.

Rack-mounted lumina

lumina on stand

100% CUSTOM

Frame and base can be configured in as many colour shades as desired, tailor-made for the point of sale.

INVOLVING

It enables video and image playback, enriching the shopping experience like never before.

INDESTRUCTIBLE
